Roomheater: „Happy“
Intermittent roomheater fired by solid fuel

Nominal power

6,0 kW

The average CO value (taken from 13% O₂):

Wood

0,038 % \triangleq 0,475g/m³

The average flue gas temperature

221,4 °C

Recommended fuels

Wood

Energy efficiency:

Wood

82 %

Minimum distance to combustible materials::

back side distance

50 cm

left/right side distance

50 cm

front side distance

80 cm

Dust emission:

Wood

0,055 g/m³

Device can be attached to a chimney with several outlets.
Please read instructions before use.
Please use only recommended fuels.
